```java
 1 public class Client
 2 {
 3     public static void main(String[] args)
 4     {
 5         int[] nums = {7, 3, 5, 2, 6};
 6         int temp;
 7
 8         final int N = nums.length;
 9
10         for (int i = N - 1; i > 0; i--)
11                 {
12                   for (int j = 0; j < i; j++)
13                     {
14                       if (nums[j] > nums[j+1])
15                       {
16                             //Swap them
17                             temp = nums[j];
18                             nums[j] = nums[j + 1];
19                             nums[j + 1] = temp;
20                       }
21                     }
22
23                   //Output the array
24                   for (int j = 0; j <= N - 1; j++)
25                   {
26                       System.out.print(nums[j] + "\t");
27                   }
28
29                   System.out.println("\n");
30                 }
31     }
32 }
```
